

Habilitation Outreach for
Professionals in Education

Online Seminars September 2006-May 2007
for Educational and Early Intervention Professionals

Hear now. And always

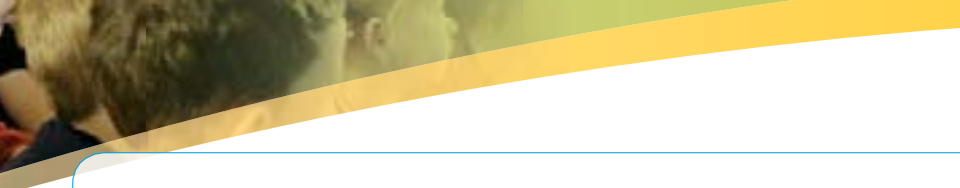

Teachers, speech-language pathologists, educational and pediatric audiologists, early interventionists, administrators and other school-based professionals are invited to participate in these free online training sessions on the educational and early intervention needs of children with hearing loss.

These seminars are offered through Audiology Online, which provides an easy-to-use virtual workshop with live audio and video. All courses are viewable on a *Windows-based* computer equipped with *Internet Explorer*. To participate in the online seminars you must be registered with **www.AudiologyOnline.com**. Your computer should be equipped with speakers (either built-in or added) and a high-speed Internet connection, to provide access to both the visual presentation (on the computer screen) and the audio (via the computer speakers). Time for questions will be reserved at the end of the presentation. Continuing Education Credits (CEUs) will be offered. A certificate of participation is provided for those who attend and fill out an evaluation form.

Registration in advance is required. For more information and to register, please visit www.audiologyonline.com/cochlear. All seminars are free and are one hour in duration.

New this Year! Courses designated with a “*” are eligible for AVT CEUs from AG Bell to individuals seeking their professional certification as an Auditory Verbal Therapist.

Thursday, September 14, 2 pm ET

Welcome to HOPE

*Ashley Garber, M.S., CCC-SLP, Mary Ellen Nevins, Ed.D., HOPE Specialists

- Resources for Professionals Working with Children with Cochlear Implants in School Settings

About us

At Cochlear™, we believe in the joys of life. We believe that our purpose is to bring the sounds of life to the ears of those who cannot hear—by providing the tools to hear, and the inspiration to explore the world. Our passion, combined with the spirit of creativity and innovation, is what enables the Nucleus® cochlear implant system to deliver the miracle of sound to over 80,000 individuals around the world.

We believe in sound. We believe that our dedication to hearing has helped Cochlear lead the industry in product safety, reliability and technological innovation for over 25 years. And we promise to continue this tradition, giving you the best possible sound. For life.

HOPE is a Cochlear Americas program that was initiated to assist school-based and early intervention professionals in addressing the needs of children with hearing loss. The full suite of HOPE products and services is listed in the HOPE area of the Cochlear website at www.cochlear.com/HOPE.
